ACKNOWLEDGEMENTS

The U.S. National Commission on Libraries and Information Science gratefully acknowledges the following for their generous support of the 2006 Health Information Awards for Libraries:

The Henderson Foundation
Mary H. ("Mitzi") Perdue, in memory of Frank Perdue
Thomson Gale
ProQuest Company

ABOUT THE 2006 HEALTH INFORMATION AWARDS FOR LIBRARIES

“One of the goals of the Commission is to strengthen the relevance of libraries in the lives of Americans, and I can think of no better way to do this than to identify and recognize library programs that help increase awareness of healthy lifestyles. The NCLIS Health Information Awards for Libraries does just that, and at the same time enables the Commission to collect information about these successful programs and disseminate that information, so that other libraries and health information organizations can study and, we trust, emulate these best practices.”

C. Beth Fitzsimmons, Ph.D.
Chairman, NCLIS

ABOUT NCLIS

The U.S. National Commission on Libraries and Information Science (NCLIS) is a permanent, independent agency of the Federal government charged by Public Law 91-345 to advise the President and Congress on national and international library and information policies, to appraise and assess the adequacies and deficiencies of library and information resources and services, and to develop overall plans for meeting national library and information needs.

ABOUT NLM

The National Library of Medicine (NLM), on the campus of the National Institutes of Health in Bethesda, Maryland, is the world's largest medical library. The Library collects materials in all areas of biomedicine and health care, as well as works on biomedical aspects of technology, the humanities, and the physical, life, and social sciences. The collections stand at more than 8 million items--books, journals, technical reports, manuscripts, microfilms, photographs and images. Housed within the Library is one of the world's finest medical history collections of old and rare medical works. NLM is a national resource for all U.S. health science libraries through a National Network of Libraries of Medicine®.
